

# Windsor

## HYBRID

H390 | H393XC

**The Windsor Hybrid is a compact multipurpose camper. The lightweight design offers the outback experience that you can tow without the heavy weight vehicle. Quick and easy to set up within a matter of minutes - and with its plentiful storage features, tech provisions and outdoor kitchen, it's perfect for impromptu weekends.**

Built in Western Australia with Future Teck™ construction, the Windsor Hybrid's low tow height is great for storage at home and provides greater fuel efficiency when on the move.

The Windsor Hybrid is available in models offering entry-level features, to RTV and off-roader options. No matter what you desire, we have a Hybrid that will suit your budget and adventure requirements.

The Hybrid's Esy-Tow™ independent suspension (ranging from the Tourer, Sport to Sport X option), will provide you with a predictable and easy towing journey, eliminating sideways and axle suspension movement for positive tracking.

The slide-out external kitchen has a

built-in sink, barbecue and burner for an enjoyable outside cook-out.

The Windsor Hybrid comes with a full-sized queen bed and memory foam mattress with easy lift-up storage underneath.

Other standard features include a rear fly screen, instant and continuous hot water system and a built-in sound system with radio, CD, DVD and USB connectivity, providing sound through external speakers.

The XC models come standard with a batwing awning and two 150W lightweight, flexible solar panels for energy efficiency.

All Hybrids come with standard safety features including a smoke detector and fire extinguisher. ■

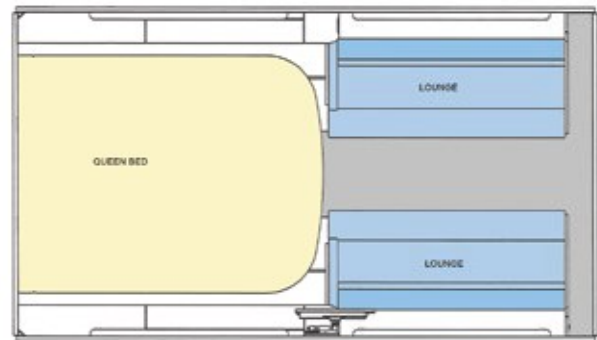

# HYBRID FLOOR PLANS
